

Smartphone App

smartSMS-NET Volume Control App

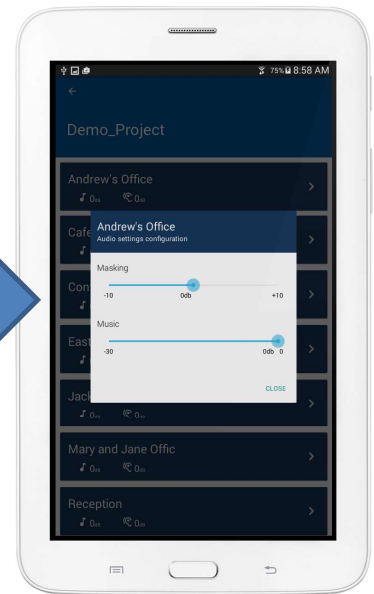

Carry your own volume control with you at all times. Our user-friendly mobile app makes it easy to adjust masking, paging and background music volume, for any specific zone within your office, straight from your Android or Apple smartphone.

View the sound masking projects on the network

Access the sound masking zones

Change the volume of any zone

Quick User Guide

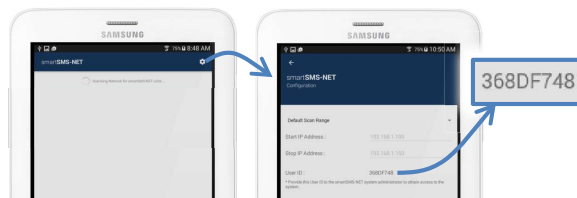

Step 1 Install the App on your Device

Open the app store on your mobile device (Google Play for Android devices and iTunes App Store for iOS devices) and search for **smartSMS-NET**.

Step 2 Adjust the App Settings

Click on the  icon in the upper-right corner of the app interface to set the scan parameters and register your device.

Contact the smartSMS-NET system administrator to get the scan range to use and provide the displayed user ID so the Administrator can register your device for the appropriate zone.

Note: This step has to be done only once.

Important: This app requires the device to be connected on the same network onto which the smartSMS-NET controllers are connected.

Step 3 Open a smartSMS-NET Project

Once your device is appropriately setup, the app scans the network for smartSMS-NET controllers. When the controllers are found, it will display the available project(s) in a list. Click on a project to view the zones and click on a zone to change the volume.
